PROJECTS

Project 1 | *Website for managing multiple-choice exams*

Feb 2023

- Web test management provides a reliable and effective solution for organizing, managing and evaluating online multiple choice tests. It helps increase flexibility, save time and provide useful information management and analysis tools for managers and users..

Project 2 | *UnibookSocial*

Sep 2023

- The book selling social network website helps users interact with each other online to post sales of all types of used books.
- Helps users easily manage book sales posts as well as book purchases in a neat and convenient way.
